

Soil Medic

Technical Data Sheet

Soil Medic—Organic Treatment Compound

Soil Medic works as a biological stimulator, soil restorer, toxin binder and soil decomposer. Our Soil Medic molecules are extracted from raw humic substances, purified and concentrated thus forming a highly reactive material. Soil Medic can be used as a stand-alone product or in combination with specific fertilizers and/or target-specific bacteria packages for the reduction of hydrocarbons or salts in impacted soils. Soil Medic is an excellent choice for breaking up highly compacted soils.

FEATURES AND BENEFITS:

- Highly active material both geologically and chemically designed to aid in the breakdown of organic matter
- Highly purified and reactive material
- Geologically interacts to form mineral complexes
- Chemically interacts with elements for strong metal binding
- Efficient cation/anion exchange properties
- Qualifies for OMRI certification (Organic Certification Standard)
- Can be easily combined with target specific bacteria for the remediation and removal of hydrocarbons and salts
- Improves available nitrogen, phosphorus, potassium and micro-nutrients for plants
- Stimulates beneficial microbial activity in soils
- Breaks up clays and compacted soils
- Increases water retention in soils
- Increases soil potential and fertility
- Works below the soil building to create a larger root mass and transport system for vital nutrients
- Enhances the breakdown of plant residues
- Improves potential yield and quality
- Helps to release “locked-up” fertilizers thus making them immediately available to the plant

TYPICAL PHYSICAL PROPERTIES:

Appearance and Color	Dark Brown Liquid
Initial Freeze Point	No Data Available
Odor	Earthy Odor
Solubility in Water	99%
Melting Point	No Data Available
Flashpoint	N/A
Specific Gravity	1.02 ± .04

APPLICATION:

Mix 1/2 – 5 gallons in a minimum 15 gallons of water per acre based on the severity of your application. Apply directly to the soil. Always conduct a soil test to determine nutrient levels and make needed amendments to assure good fertility levels in your soil. Soil Medic is compatible with many agricultural chemicals but is not guaranteed to be so. When tank mixing with other chemicals, always read and follow the label directions of the chemical(s) you are considering. A jar and/or strip test before use is always suggested.

Soil Medic works below the surface to build healthier soils!

PACKAGING:

Soil Medic is packaged in 5 gallon to 275 gallon containers. Bulk quantities are available upon request.
